Bachelor of Computer Science and Minor in Math

WORKING EXPERIENCES

Firm : SYSBOT RESOURCE SDN BHD
Period : 2024 - Current
Position : IT Executive

Job Description : As an IT Executive:

- *Managed and supported multiple project sites nationwide, ensuring all systems, hardware, and software operated smoothly and met operational requirements.*
- *Provided comprehensive IT support to internal departments and project teams, ensuring uninterrupted day-to-day operations.*
- *Acted as a key technical coordinator for government projects, liaising with clients, stakeholders, vendors, and internal engineers to ensure successful execution.*
- *Planned, coordinated, and supervised nationwide deployments, including logistics planning, manpower coordination, travel arrangements, and cost estimation for deployment teams.*
- *Conducted end-user training, on-site support, and system handover sessions for government officers to ensure effective system adoption and usage.*
- *Performed system maintenance, software updates, patch deployments, and troubleshooting across multiple locations to ensure system stability, security, and compliance.*
- *Led data preparation, cleaning, and validation processes for government-provided datasets to ensure accuracy and compliance prior to system use or production.*
- *Designed and developed automation solutions using Python to streamline operational workflows, including automated image processing, QR code generation, and data-driven tasks.*
- *Designed card templates and managed secure card printing operations using HID card printing systems, ensuring adherence to government specifications and quality standards.*
- *Oversaw production, quality control, packaging, and secure delivery of sensitive materials and devices in accordance with strict government timelines and protocols.*
- *Coordinated and supervised engineers and technicians to optimize task allocation, site execution, and project timelines.*
- *Prepared operational analysis, progress reports, and documentation for management and government stakeholders to support monitoring and decision-making.*
- *Designed and developed the company website to enhance corporate branding and online presence.*
- *Performed junior graphic design tasks to support marketing, documentation, and project presentation needs.*
- *Delivered professional consultation services to clients, providing tailored technical and operational solutions based on project requirements.*

Firm : **Zeto Travel Sdn Bhd**

Period : 2022

Position : Internship

Job Description : As an E-commerce & Marketing Intern:

- *Created visually appealing product listings and designed engaging promotional materials using Canva for various products on e-commerce platforms such as Lazada and Shopee.*
- *Assisted in establishing a production database, ensuring accurate data entry and maintaining data integrity.*
- *Wrote accurate and compelling product descriptions, effectively highlighting key features and benefits to attract potential customers.*
- *Supported daily e-commerce operations, including inventory updates, order processing, and customer support.*
- *Conducted market research to identify trends and new opportunities, providing actionable insights to support product development and marketing strategies.*

CERTIFICATION CREDENTIALS

Kaseya Certified Technology Specialist

KEY PROJECTS

JABATAN AKAUNTAN NEGARA – BWTD (2026)

- *Deployed and coordinated project-related items and systems across multiple locations nationwide to support the BWTD initiative.*
- *Planned, coordinated, and executed nationwide deployment activities, including sourcing and locating required items throughout Malaysia.*
- *Prepared detailed travel planning and cost estimation for the deployment team, including logistics, accommodation, and transportation expenses.*
- *Conducted end-user training for government officers on system and software usage to ensure smooth operational adoption.*
- *Performed software updates and patch deployments at various sites nationwide to maintain system stability, security, and compliance.*
- *Coordinated closely with internal teams, project managers, and government stakeholders to ensure successful deployment and timely project completion.*

JABATAN PENDAFTARAN NEGARA – KAD KUASA STAF (2025)

- *Managed the end-to-end process of staff card production, from data preparation to printing and final delivery.*
- *Performed data cleaning, validation, and consolidation of staff records provided by JPN using Excel to ensure accuracy before card production.*
- *Designed and configured staff card templates using HID card printing software in accordance with JPN specifications.*
- *Developed automation scripts using Python to automatically download staff images and generate QR codes based on validated data prior to printing.*
- *Executed card printing operations and conducted quality checks to ensure data integrity, print accuracy, and consistency.*
- *Coordinated logistics and delivery of completed staff cards to designated JPN locations.*
- *Collaborated with internal teams and JPN representatives to resolve data discrepancies and ensure timely project completion.*

Border Pass Malaysia – Thailand – Imigresen Malaysia (2025)

- *Provided end-to-end technical support and system maintenance for the Malaysia Border Pass initiative, ensuring smooth operation of all systems and devices across multiple sites.*
- *Coordinated the supply and delivery of border passes and supporting hardware to designated locations in compliance with project timelines and quality standards.*
- *Worked closely with internal teams and external partners to manage system setup, device configuration, and ongoing troubleshooting.*
- *Monitored system performance and conducted regular maintenance checks to ensure optimal functionality and data accuracy.*
- *Assisted in generating progress reports and updates for project managers and government stakeholders.*
- *Provided on-site training and consultation to users and operators to ensure effective use of the system and devices.*

Pemacu Pena SPM – Lembaga Peperiksaan (2024)

- *Supported the supply and distribution of pemacu pena (USB drives) containing audio materials for the SPM Hearing Exams in Bahasa Melayu (BM) and English (BI), in compliance with the requirements of Lembaga Peperiksaan Malaysia.*
- *Coordinated production, data loading, and quality assurance processes to ensure all USB drives contained accurate and fully functional audio content.*
- *Managed packaging, labelling, and secure delivery of the USB drives to designated exam centres across Malaysia, ensuring compliance with strict timelines and exam protocols.*
- *Assisted in conducting functionality testing of the devices to ensure audio clarity and compatibility with playback equipment used during the examinations.*
- *Worked closely with internal teams, logistics providers, and representatives from Lembaga Peperiksaan to address any technical or delivery issues.*
- *Contributed to project documentation and provided status updates to project managers and stakeholders.*
