

ADLI JABIR

IT Executive | Technical Support | Deployment Coordination

+60 19-878 6832 | adli.fx00@gmail.com

PROFESSIONAL SUMMARY

IT Executive with experience supporting hardware, software and users across multiple sites nationwide. Combines hands-on troubleshooting and deployment coordination with user training, Excel data validation and Python automation. Works with clients, vendors and technical teams to maintain day-to-day operations and deliver system rollouts.

CORE SKILLS

Technical support: Hardware and software troubleshooting, device configuration, system maintenance, software updates and patch deployment.

Delivery and data: Nationwide deployments, user training, vendor coordination, cost estimation, technical documentation, Microsoft Excel, Python automation and production software.

PROFESSIONAL EXPERIENCE

IT Executive | Sysbot Resource Sdn. Bhd.

2024 - Present

- Provide IT support to internal departments and client sites, troubleshooting hardware and software issues to support daily operations.
- Coordinate nationwide system and equipment deployments, including sourcing, technician allocation, logistics, travel arrangements and cost estimates.
- Carry out system maintenance, software updates and patch deployments; work with clients, vendors and engineers to resolve technical issues.
- Conduct on-site user training and system handovers, explaining software operation and device use to end users.
- Clean and validate client datasets in Excel, resolving incomplete or inconsistent records before processing and production.
- Developed Python scripts to automate image downloads and QR code generation for a data-driven production workflow.
- Configure production templates and coordinate printing, quality checks and delivery to meet client requirements.
- Prepare progress reports, operational analysis and technical documentation for management; developed the company website and supported graphic design tasks.

E-commerce and Marketing Intern | Zeto Travel Sdn. Bhd.

2022

- Created Shopee and Lazada product listings, wrote product descriptions and designed promotional materials using Canva.
- Assisted with production database setup and accurate data entry; supported inventory updates, order processing, customer enquiries and market research.

EDUCATION

Bachelor of Computer Science, Minor in Mathematics | 2023

Universiti Sains Malaysia, Penang

Science Stream | Kolej Matrikulasi Selangor, Banting | 2019

CERTIFICATION

Kaseya Certified Technology Specialist (KCTS)

SELECTED PROJECT EXPERIENCE

Adli Jabir | Sysbot Resource Sdn. Bhd.

Nationwide System Deployment and User Training

Jabatan Akauntan Negara Malaysia | 2026

- Coordinated the sourcing and deployment of equipment and systems across multiple locations nationwide, aligning site requirements with available resources.
- Prepared deployment schedules, travel plans and cost estimates covering transportation, accommodation and team logistics.
- Conducted end-user training on software and system operation, and carried out software updates and patch deployments at client sites.
- Worked with project managers, internal technical teams and agency representatives to coordinate site activities and resolve deployment issues.

Data Automation and Production Support

Jabatan Pendaftaran Negara Malaysia | 2025

- Managed the workflow from client data preparation and validation through production, quality checks and final delivery.
- Cleaned and consolidated records in Excel, collaborating with client representatives to resolve missing information and data discrepancies.
- Developed Python scripts to automate image downloads and QR code generation using validated records, supporting repeatable data preparation.
- Configured production templates, checked output accuracy and consistency, and coordinated delivery to designated client locations.

Multi Site Technical Support and Operations

Jabatan Imigresen Malaysia | 2025

- Provided technical support and system maintenance across multiple client sites, working with internal teams and external partners on setup and troubleshooting.
- Coordinated the supply and delivery of project materials and supporting hardware in line with operational schedules and quality requirements.
- Monitored system performance, carried out maintenance checks and assisted with progress reporting for project managers and agency stakeholders.
- Provided on-site training and consultation to help users operate systems and devices effectively.

Digital Content Preparation and Distribution

Lembaga Peperiksaan Malaysia | 2024

- Supported production, content loading and quality assurance for a nationwide distribution project, checking completeness and functionality before dispatch.
- Performed compatibility and playback checks to confirm that digital content functioned on the intended equipment.
- Coordinated packaging, labelling and delivery to designated locations in accordance with project schedules and handling requirements.
- Worked with logistics providers and client representatives to address technical or delivery issues, and maintained project documentation and status updates.
